Summary

Principal UX Designer with 20+ years leading user-centered design for complex B2B enterprise SaaS platforms, grounded in Industrial Design foundations and early experience in manufacturing product development. Expert in designing intuitive, scalable experiences that integrate AI/ML (computer vision, NLP, OCR, rule-based systems) into human-in-the-loop workflows, enhancing transparency, trust, decision-making, and efficiency across data-heavy processes. Delivered measurable productivity gains, user satisfaction improvements, and revenue impact through research-driven interfaces, interaction models, and design systems—transferable to manufacturing value chains including configuration, pricing, and lifecycle management.

Skill Stack

- Design Tools: Figma, Axure RP, Sketch, Adobe Suite
- UX/UI: High-fidelity prototypes, Responsive Design, Wireframing, Visual Design, Interaction Design, Component-based Design Systems
- Design Systems: Governance, Documentation, Accessibility (WCAG), Standards Evolution
- Research: Qualitative/Quantitative User Research, User Interviews, Usability Testing, Journey Mapping, Data-driven Insights
- Process: Agile Development Lifecycle, User-Centered Design, Design Thinking, Stakeholder Alignment, Cross-Functional Collaboration
- Tech: HTML/CSS/JS, Human-in-the-Loop AI/ML Integration, AI-Assisted Design Workflows
- Patents: [7 U.S. Patents](#) for user interface design

Experience

DESIGN CONSULTING – Self-Employed – Webster, NY / Hybrid Principal UX Consultant
User Experience Design Consulting JUL 2023 – Present

- Designed and built *ai-ux Behavior Studio*, a collaborative prototyping tool enabling UX teams to define, version, test, and refine AI behaviors for production deployment—incorporating AI-assisted workflows to accelerate ideation and synthesis while maintaining human oversight.
- Provided UX leadership for a FinOps startup, designing intuitive data-driven interfaces to support resource allocation and decision-making.

XEROX – Rochester, NY / Hybrid Senior User Experience Designer
Intelligent Document Processing, Productivity, and Imaging Solutions AUG 2024 – OCT 2025

- Led design of AI-enabled document processing workflows integrating OCR, NLP, and computer vision with human-in-the-loop verification to support custom model building, data refinement, transparency, and compliance for enterprise users in insurance and banking.
- Conducted user interviews and usability testing to inform intuitive interfaces, improving operational visibility, efficiency, and trust in AI-assisted decisions.

COUPA – San Mateo, CA / Remote Principal User Experience Designer
Business Spend Management SaaS MAR 2022 – JUN 2023

- Owned end-to-end UX for supplier platform, incorporating AI-derived insights (vendor trust scores) into decision workflows, driving 40% profile completion increase and \$5M incremental revenue through usable, data-transparent experiences.
- Redesigned onboarding flows with progressive disclosure, rule-based logic, and AI background processing to reduce friction and support complex enterprise configurations.

CLOUDCHECKR/NETAPP – Rochester, NY / Remote

Lead User Experience Designer

Cloud FinOps and SecOps Platform

SEP 2019 – MAR 2022

- Defined phased UX strategy and interaction models for complex cloud cost allocation and security platform, using data storytelling, progressive disclosure, and scalable interfaces to boost productivity and customer value.
- Mentored designers while leading research synthesis, usability validation, and cross-functional collaboration in Agile sprints.

EAGLEVIEW – Rochester, NY

Senior User Experience Designer

Geospatial and Image Analysis (Construction, Government, Insurance, Energy)

JUL 2018 – SEP 2019

- Redesigned image QC and review workflows integrating computer vision AI/ML with human-in-the-loop feedback loops, enabling model refinement and delivering >50% productivity/revenue gains through accelerated, trustworthy processes.
- Conducted contextual inquiry, shadowing, and iterative testing to create spatially aware grids, bulk actions, and data visualizations for complex geospatial datasets.

KODAK ALARIS – Rochester, NY

User Experience Design Consultant

Document Processing, Management, and Imaging Solutions

MAR 2015 – OCT 2017

- Designed streamlined document classification/extraction experiences using OCR and LLM-based AI with human verification, achieving 30% faster completion and 20% error reduction in enterprise workflows.
- Established design system foundations and behavioral guidelines ensuring consistency across embedded, SaaS, desktop, and mobile products.

DELL/KACE – Mountain View, CA / Remote

Principal User Experience Designer

Endpoint Device Management and IT Solutions

MAY 2011 – MAR 2015

- Led full-cycle design of mobile device management solution from discovery to launch, exceeding sales targets by 50% and generating \$10M first-year revenue through intuitive, scalable interfaces.
- Directed responsive redesign of mobile companion app for seamless cross-device experiences, achieving rapid adoption.

Additional Experience

INDUSTRIAL DESIGN & MANUFACTURING: Product design and development for physical manufactured goods, including (Crosman Airguns, Ranging Rangefinders) and office equipment (Smith Corona typewriters);

Education

SYRACUSE UNIVERSITY – Bachelor of Industrial Design

Udemy – Object Oriented OOUX Fundamentals
